BookStore - Features Document

Project Overview

BookStore is a real-world online bookstore website built using the MERN Stack (MongoDB, Express.js, React.js, Node.js). The platform allows customers to browse, search, purchase, and review books while providing administrators with complete control over books, users, categories, and orders.

User Roles

Customer

A customer can:

- Register an account
- Login securely
- Logout
- Reset password
- Browse all books
- Search books
- Filter books
- View book details
- Add books to cart
- Update cart quantity
- Remove books from cart
- Add books to wishlist
- Remove books from wishlist
- Checkout
- Place orders
- View order history
- Track order status
- Manage profile
- Manage addresses
- Write reviews
- Edit reviews
- Delete reviews

Administrator

An administrator can:

- Login securely
- Access Admin Dashboard
- View sales overview
- Manage books

- Add books
- Edit books
- Delete books
- Manage categories
- Manage users
- Block or activate users
- Manage orders
- Update order status
- View customer reviews
- Delete inappropriate reviews

Customer Features

Authentication

- User Registration
- User Login
- JWT Authentication
- Logout
- Forgot Password
- Reset Password

Home Page

- Hero Banner
- Featured Books
- New Arrivals
- Best Sellers
- Categories
- Search Bar
- Special Offers

Book Catalog

- Browse Books
- Book Categories
- Search Books
- Filter by Category
- Filter by Author
- Filter by Language
- Filter by Price
- Sort by Rating
- Sort by Price
- Pagination

Book Details

- Book Cover
- Book Title
- Author Information
- Publisher
- ISBN
- Language
- Description
- Price
- Stock Availability
- Customer Reviews
- Ratings
- Related Books

Shopping Cart

- Add to Cart
- Update Quantity
- Remove Item
- Clear Cart
- View Total Price

Wishlist

- Add Book
- Remove Book
- Move to Cart

Checkout

- Shipping Address
- Order Summary
- Payment (Test Mode)
- Order Confirmation

Orders

- Order History
- Order Details
- Order Status
- Cancel Order (if applicable)

Reviews

- Add Review
- Edit Review
- Delete Review
- Star Rating

User Profile

- View Profile
- Edit Profile
- Change Password
- Manage Addresses

Admin Features

Dashboard

- Total Users
- Total Books
- Total Orders
- Total Revenue
- Recent Orders
- Recent Users

Book Management

- Add Book
- Edit Book
- Delete Book
- Upload Cover Image
- Update Stock

Category Management

- Create Category
- Edit Category
- Delete Category

User Management

- View Users

- Search Users
- Activate User
- Block User

Order Management

- View Orders
- Update Order Status
- Search Orders

Review Management

- View Reviews
- Delete Reviews

Security Features

- JWT Authentication
- Password Hashing (bcrypt)
- Role-Based Access Control
- Protected Routes
- Input Validation
- Error Handling

Future Features

- AI Book Recommendations
- Google Login
- Email Notifications
- Coupons
- Discounts
- Recently Viewed Books
- Book Recommendations
- E-book Support
- Multi-language Support
- Dark Mode
- Progressive Web App (PWA)

Technology Stack

Frontend

- React.js
- React Router
- Tailwind CSS
- Axios

Backend

- Node.js
- Express.js

Database

- MongoDB Atlas

Authentication

- JWT
- bcrypt

Image Storage

- Cloudinary

Deployment

- Vercel (Frontend)
- Render (Backend)

Project Goal

Build a professional, scalable, and responsive online bookstore website that follows modern software engineering practices and demonstrates full-stack MERN development skills for internship and portfolio purposes.
